

ATTACHMENT TO PTO/SB/52 (08-99) - OMB 0651-0033

At least one error upon which reissue is based is described as follows:

Applicant believes U.S. Patent No. 5,979,350 to be wholly or partly inoperative or invalid through error of an inventor incorrectly not named in the issued patent, which error arose without deceptive intention on the part of the inventors or their assignee.

U.S. Patent No. 5,979,350 issued on November 9, 1999 from Application Serial Number 09/036,826 filed March 9, 1998. U.S. Patent No. Des. 409,972 issued on May 18, 1999 from Application Serial Number 29/078,494. A Petition to Correct Inventorship for U.S. Patent No. Des. 409,972 was filed May 2, 2000 to correctly identify Robert Todd, Borden M. Larson and William N. Snook as co-inventors. Assignments from correctly named co-inventors to Correct Craft, Inc. were executed and filed for recording.

As indicated above, Application Serial Number 09/036,826 was filed during the pendency period of Application Serial Number 29/078,494. Both applications have the above, now correctly named co-inventors. Claims issuing in U.S. Patent No. 5,979,350 are directed to the embodiment and supported by the disclosure of U.S. Patent No. Des. 409,972. Patentee asks that the claim to priority to Application Serial No. 29/078,494, filed October 27, 1997, and issuing as U.S. Patent No. Des. 409,972 be entered and that a Reissue Patent properly show such claim.
